

North End of North/South Trail

Land Between The Lakes National Recreation Area

January 2009

The North/South (N/S) Trail spans the entire length of Land Between The Lakes (LBL). The northern portion of the North/South Trail consists mainly of single track trails meandering

from shoreline to heavily wooded ridges. The northern portion has five trails leading to springs, three backcountry shelters for overnight camping, and a connector trail to the Nature Station. The trail leads users to scenic remote areas and developed facilities. The trail provides stretches where users walk parallel to Kentucky Lake and sweep into large bottoms offering a sense of solitude. The N/S Trail intersects many of LBL's designated roads allowing for many loop opportunities and access points to hike the trail piece by piece.

The N/S Trail is a multiple-use trail. Bikers and hikers share the northern portion of the trail.
